FIELD

# B100PRO Cargo drone

High mountains and steep obstacles, mountain and sea barriers, and difficulty in transporting goods; B100 Pro cargo drone for you to cross mountains and seas, efficient and effortless; Equipped with strong power, it can carry 50kg of goods. The oversized open door cargo compartment is convenient and efficient for loading goods

# | Application shooting

Efficient power redundancy, total takeoff weight up to 110kg, wind resistance level up to 5

Integrated high-performance ground station with a communication distance of up to 20 kilometers

# Technical Parameter

## Cargo drone parameters

Full load takeoff weight of the entire aircraft	110kg
Overall dimensions	1725*1755*1100mm
Warehouse space	940*440*470mm
Maximum freight weight	50kg
Maximum flight distance	10 kilometers
Fastest flying speed	13.8m/s
Maximum flight altitude	≤200m
Number of batteries	Single/dual battery, flexible combination for use

## Dual battery flight time

Carrying idler	30min	5KG	27min
20kg	25min	30kg	20min
40kg	17min	50kg	12min
